## **Extreme CCTV Gets the FULL PICTURE**

### **EX36 Night Vision Camera Approved by Prison Authorities**

The **EX36 Night Vision Corner Camera** is designed to provide superb optics of the entire room including all four of its walls and every square foot of floor space on a day/night basis, even in the pitch black of darkness.

“To see the entire room, including all of the walls, is important in psychiatric care facilities,” says Melissa Bailey, Regional Sales Manager for Extreme CCTV. “The EX36 camera’s night vision capability and design for safety make it the preferred specification for video monitoring in prison cells and hospital care rooms.”

Other safety features include a no-grip design, flush mount detailing and recessed safety screws, tough polycarbonate windows. According to Ms. Bailey, the EX36 is now approved by authorities at the USA Federal Bureau of Prisons, at Corrections Canada, and at Corrections New Zealand where 250 units were already installed for a prison project landed by Detection Systems Ltd.

“The design reduces the chances of suicides by hanging. Our installers love the one-piece fixture for a no-fuss, easy install!”

... **Solicitor General /  
Ontario Police**

"The EX36 cameras are practically indestructible. Patients cannot knock them out of focus or pull them off the wall. Also, the IR lighting provides a very good picture when the lights go out."

## Performance Specification

---

### Prison Cell / Psychiatric Care Room Surveillance

Left: Using a Quattro version EX36Q.9302 camera and a 2.5 mm lens, every square foot of floor space is captured. Except for a few square inches, there is no place to hide from the wide angle lens. All four walls and 99% of the floor is seen in this 9 foot x 15 foot room. Both the Quattro and Monochrome models automatically switch to infrared mode to get the picture in total pitch black darkness as seen in the picture below left.

Left: A totally dark room is revealed in infrared reflectance using the EX36Q.9302. At 940 nanometers, there is no detectable glow off the 84 LEDs that are used to provide the invisible lighting.

Above: The corner mount EX36 is a ruggedized no-grip design that minimizes the possibility of using it for self inflicted harm.
